# PatchIO & Cubase Setup Instructions for macOS

1. Open **Audio MIDI Setup** on your Mac.

2. In the top menu, go to **Window > Show MIDI Studio**.

3. In the MIDI Studio window, double-click on the red **IAC Driver** icon.

4. In the IAC Driver Properties, click the [+] button to add a new port, and name it `PatchIO`. Make sure 'Device is online' is checked.

5. Open **Cubase** and go to **Studio > Studio Setup**.

6. On the left, click **Add Device** and choose **Generic Remote** from the list.

7. In the new Generic Remote section:

   - Set **MIDI Input** to `IAC Driver PatchIO`

   - Set **MIDI Output** to `IAC Driver PatchIO`

   - Click **Import** on the right, and import the XML file `PatchIO_Macros.xml` which you can download from this link:

https://app.box.com/s/r06shd28dt6b6ct551ns61tuc9fcja5i

That's it! Now you're all set to use the integration feature with Cubase – you can right click on any Kontakt instrument you found inside PatchIO, and let the app open a track for you in Cubase with this specific instrument.
